

Rumors are true!

Blue Stream Fiber will begin construction in Waterside Village of Palm Beach over the coming weeks.

We will be improving the network in your neighborhood!

During this time, you can expect us to mark up certain areas and work on laying the underground fiber. All fiber will be placed in existing utility easements, which may be at the front, rear or sides of your property.

We understand that the construction process can come with a ton of questions. To help you feel prepared every step of the way, you can find answers to the most common construction questions at **bluestreamfiber.com/construction**.

Additionally, if your property is impacted during the construction, no need to worry, we have a restoration process in place to ensure it is restored to its original condition upon completion. For any construction related support, please call **561-264-2885** and press the construction support option on the menu.
